

I & C and Electrical Services

The Westinghouse Solution

Westinghouse has more than 40 years of experience providing integrated specialty maintenance and technical services. We provide experienced project management and union and non-union labor who understand the demands of our customers and deliver quality I&C, Electrical Maintenance and Specialty Services. Our capabilities include MWO reduction, implementation testing and procedure writing as well as training services.

I&C Maintenance

- Instrument Loop Calibration & Testing
- Programmable Logic Controllers (PLC)
- Transmitter & Controller Calibration
- Pressure Temperature & Flow Sensor Calibrations
- Indicators, Transmitters, Transducers & Square Root Extractors
- Positioners and I/P, I/E Converters
- Security Equipment Maintenance: multiplexers, taut wire, cameras, etc.
- Digital Control Systems (DCS) & Annunciators
- Main Control Board Recorders & Indicators
- Plant Process Computer Systems
- Network System testing – Sisco, SQL, Microsoft, Perle, Crystal, Fiber
- Failover and Redundancy Testing (FMEA)
- Radiation Monitoring System Testing and Repair
- Digital Positioners

Electrical Maintenance

- Low & Medium Voltage Switchgear
- Motor Control Center Maintenance
- Bus Inspections, Cleaning & Maintenance
- Low & High Voltage Electrical Terminations
- Temporary Power
- Molded Case Breakers
- Battery Charger/Inverter Maintenance
- Conduit Installation Cable Pulls & Terminations
- Transformer Protection Circuits
- Protective Relay Maintenance
